

# THE H.E.L.P. SYSTEM

## HELIPORT EMERGENCY LANDING PACK

**The H.E.L.P. System - Heliport Emergency Landing Pack** is an extremely portable, passive-lighting system. **The H.E.L.P. System** is comprised of eight (8) high intensity - H.I. Retro-reflective - RL Edge Markers - Model 336-2, designed for emergency night operations, requiring immediate deployment. **The H.E.L.P. System** is supplied in a rigid carrying case, so compact that this case can be transported inside the helicopter or even in the trunk of a car.

The Model 336-2 RL markers operate by reflecting the light from the approaching helicopter's landing light, giving the Model 336-2 RL marker a visibility range of 3 - 4 NM+ even at extreme approach angles. With no need for or dependency on electricity, cables or even an ON-OFF switch, **The H.E.L.P. System is always ON** and ready for use, giving the pilot complete control of the approach and landing, where ever and when ever called upon.

**The H.E.L.P. System's** unique, patented design ensures that complete installation takes only minutes. In emergency situations where seconds count **The H.E.L.P. System** will provide a safe, cost effective and reliable helicopter night time landing zone, time after time, year after year.
